

ACTIVE SHOOTER SCENARIO

INNOVATIVE TACTICAL TRAINING SOLUTIONS

GAIN THE TACTICAL ADVANTAGE IN ACTIVE THREAT MANAGEMENT

Active shooter situations are unpredictable and evolve quickly. Introducing a dynamic, expandable, full-mission profile, training solution designed to take force-on-force, and scenario-based, training to new levels of realism.

Simulated gunfire, improvised explosive devices, smoke, noise and blood create a memorable training experience. Allows for seamless integration into ALERRT & ASTTP programs.

With industry-leading durability and easy set-up, rapid reset and low maintenance, the **Tactical Operations Medical Manikin** from ITTS and Techline Technologies provides the best of all worlds with realistic injuries and hemorrhaging, supported by 160 pounds of solid silicone body and welded steel frame and joints.

Simultaneously control up to four units in your scenario with the hand-held remote, each unit customized with up to 250,000 possible wound combinations, making TOMManikin the most effective scenario training manikin available today.
